

Bitcoin Suisse Vault

Peace-of-mind for crypto asset custody

Customizable, banking-grade cold storage solution offering complete control and flexible access using a tailor-made multi-signing process for a wide range of crypto assets. Clients control the crypto assets while Bitcoin Suisse manages the private keys.

Banking-Grade Cold Storage Solution

The Bitcoin Suisse Vault solution is redundantly built and features highest physical and cryptographic security standards including EMP protection. Client-specific security features include whitelisted withdrawal addresses, artificial time-delays and multi-signing processes. The client has the option to segregate roles between several persons who can initiate, cancel and approve transactions. Bitcoin Suisse Vault is offered as Storage-as-a-Service via a user-friendly web-portal.

The solution and the key generation process have been independently audited by PricewaterhouseCoopers, Grant Thornton and Zühlke Engineering and is documented in ISAE 3402 audit reports.

Our Offering

- **Flexible account set-up**, including multi-signing processes tailored to client's needs
- **Self-directed withdrawals** by persons authorized by the clients, giving clients complete control of their crypto assets without personally managing private keys
- Banking-grade cold storage as a service:
Hardware free for clients
- **24/7 access** to the Bitcoin Suisse Vault service
- All crypto assets are stored on multiple, separate and individual blockchain addresses, **eliminating counterparty risk for clients**
- Allowing clients to store **wide range of crypto assets**: BTC, ETH, XRP, BCH, BSV, LTC, BTG, TRX and all ERC20/223 tokens as well as EWT (permissioned chain)
- **Swiss reliability and quality of service** with private keys never leaving Switzerland

Fees and Terms

- No set-up fee
- No minimum volume required
- Storage fee: 0,4%-0,6% per annum (calculated on a daily basis)
